

Pumping Unit Services

The Total-Western Pumping Unit Division was started in May of 1999 to add to the growing list of value added services we strive to provide our customers. With a proven track record of safety and quality our Pumping Unit Division will manage all facets of your pumping unit assets including:

- Location Engineering - Transportation, installation, and inspection of all brands and types of units
- Field and shop repair of all brands and types of units - Polish rod changes - Stuffing box repairs
- Gear Box repair and oil changes - Lube services - Rig Support Services
- Optimizations - SPM, Balances, Stroke Changes - Manufacturing and installation of concrete bases
- Developing preventative maintenance programs - Asset Inventory Tracking
